Cooking Guide
Great Ideas, Tips and Recipes for Your Italia Artisan Pizza Oven
Congratulations on the purchase of your Italia Artisan Pizza oven. This guide has been put together to assist you as you learn how your new pizza oven cooks.

Enjoy trying new recipes and have fun experimenting with your pizza oven. It may take some trial and error to learn correct temperature control, but this guide will help you channel your inner chef and cook like a pro.

Using Your Italia Pizza Oven

**Pizza Oven Accessories**

- **Infrared Thermometer**
  Always know the temperature of any spot in the Italia Pizza Oven with the Infrared Thermometer. It reads temperatures quickly and accurately to ensure that you cook the perfect pizza every time. Also great for indoor baking/cooking use.

- **Pizza Peel**
  The Camp Chef Italia Artisan Pizza Peel simplifies artisan pizza preparation. Simply dust the peel with flour, spread your pizza dough out, and add toppings. Your pizza creation will then easily glide into your pizza oven with ease, just like a true artisan!

- **14” Rocking Pizza Cutter**
  The Camp Chef Rocking Pizza Cutter cleanly cuts thinner artisan style pizzas and deep dish pizzas into perfect sections with ease. The 14” stainless steel blade is curved to provide superior cutting capabilities which cuts straighter and more thorough than traditional pizza cutting wheel. With one quick rocking motion you will be able to efficiently cut through toppings, cheese and dough leaving crisp edges. The Rocking Pizza Cutter is easy to clean and simple to use.

- **Professional Chef Pizza Spatula**
  The Camp Chef Stainless Steel Pizza Spatula was designed specifically for dealing with wide loads. Perfect for simple lifting and placing of pizzas and breads to and from the oven. A long, ergonomically designed handle makes handling food effortless. Durable stainless steel construction.

**Pizza Oven Use Instructions**

**Understanding Temperatures**

There are two temperature zones you should be aware of with your pizza oven. The internal air temperature and the temperature of the pizza stone.

**Internal Air Temperature**

You can read the internal air temperature by looking at the built-in temperature gauge on the top of the pizza oven. Internal air heat will help cook your crust, cheese and toppings. The internal air temperature will react quickly when you change the amount of heat produced by your Italia Pizza Oven.

**Pizza Stone Temperature**

The pizza stone temperature will rise slower than the internal air temperature at first, but will gradually equalize with the temperature gauge on the oven.

**Pre-Heating Instruction**: 10-15 minutes on high heat.

Read and follow all instructions in the PZOVEN manual before using this oven. It is essential to preheat your pizza oven before use to ensure the right cooking environment for your pizza.

**Remove door from oven**

1. **Ignite**. Press in the heat control knob or slowly turn counter-clockwise until it clicks. Wind will effect the air temp. of the oven more than the stone temp. Ensure that the burner has lit. Turn to high heat and place oven door over opening.
2. **Heat**. Allow pizza oven to heat up for 10-15 minutes on high heat. Heat pizza stone to 550°-600°F. Once preheated, remove oven door. USE CAUTION, DOOR WILL BE HOT! When door is removed, air temperature will decrease about 100°F; stone temperature will decrease about 30°F.
3. **Maintain/Adjust**. Maintain temperature on high to medium and use oven door to keep the heat at desired level while cooking your pizzas, depending on the type of pizzas being cooked and the number of pizzas.

**Note**: In most cases you can cook with the door removed. However, in cold or windy conditions the door may be used to help maintain the temperature inside the oven and the stone.

Always be sure to turn off the oven with finished cooking pizza and turn off gas.

**Residual heat**: After use, pizza stone, oven and oven surfaces will remain hot as heat slowly dissipates, use caution.

**Preheat Temperature Range Guide** (Valve set at high with door closed)

<table>

</table>

Remove oven door - Temperatures will drop slightly

590-610°F

-600 +/- 50°F

*Monitor temperatures, temperatures are approximate

**DO NOT LEAVE UNATTENDED. DO NOT OVERTHEAT STONE TEMP. OVER 650°F or OVEN TEMP. OVER 750°F.**

Maintain temperature by adjusting the heat control knob to keep the heat at the desired level for the number and styles of pizza's being cooked.

Cooking Pizza 101

Maintain temperature by adjusting from medium to high to keep the heat at the desired level for the number and styles of pizza’s being cooked.

Three Types of Dough

Artisan style – Make your own (recipe included)
Premade dough from local bakery, pizza shop, or grocery store bakery
Frozen/refrigerated dough from grocery store

Three Types of Dough

When the oven is heated, adjust temperature for type of pizza being cooked.

The pizza stone temperature will rise slower than the internal air temperature at first, but will gradually become hotter than the air.

Artisan Pizza: Approximately 500°-550°F stone temp.
Artisan Thin Crust Pizza: Approximately 500° - 600°F stone temp.
Homemade or Deep Dish Pizza (Lots of toppings) Approximately 350° - 425°F stone temp.
Frozen Premade Pizza Approximately 375° - 420°F - Follow instructions provided with pizza.

We highly recommend using a cooking surface thermometer or Infrared Thermometer to gauge the temperature of the pizza stone.

Thin vs. Thick Dough

Thicker dough, like premade dough from a store, will need to be rolled with a rolling pin. When cooking, you will need slightly lower stone temperatures and longer cook times.

Stretched/hand tossed thin dough, like the dough recipe found in this booklet, are cooked faster and at higher temperatures.

Size of Ball / Shape of Crust

A dough ball the size of an orange or softball will provide a 10-12 inch crust.

Toppings

Tip: Less is better for a great pizza; do not overload your pizza with a lot of toppings. Depending on the amount of toppings you use, you may need to slightly adjust cook times.

Cooking Your Pizza

In general, cook an artisan pizza with thin crust at 500°- 600°F for 4-7 minutes. Thicker crust and more toppings will require more time and lower temperatures. For premade pizzas and frozen pizzas, follow instructions provided with pizza.

Artisan Pizza - Thin Crust

1. Follow included dough recipe to prepare dough.
2. Flour surface and stretch dough ball onto table or wooden pizza peel. Stretch your dough to 1/8” thickness, 10” – 12” round.
3. Follow pizza recipe instructions to construct your pizza by adding any sauce, cheese, and toppings.
4. Using a flour-dusted pizza spatula or pizza peel, add your pizza to preheated oven (500° F - 550°F).
5. Cook 4-7 minutes or to your liking.
6. Remove pizza from oven and onto pizza peel, slice and serve.

Always be sure to turn off when finished cooking pizza.
Artisan Pizza Dough

Makes: 6 orange-sized dough balls

Ingredients

3 cups warm water
1 T. and 1 t. active dry yeast
1 T. and 1 t. salt
4 cups all purpose flour
2 ½ cups bread flour

Instructions

You will want a large, clean bowl to make and hold the dough in. Measure 3 cups warm water into the bucket; add yeast, salt, and flour. Mix until all the flour is moist, the dough should be firm but sticky. Let this rise until it doubles, about 1 hour. The dough is now ready to shape into dough balls or put in the fridge until it is ready to use, this will last 3 days. The dough is much easier to handle after being chilled in the fridge. Scrape dough out of the bucket and shape into 6 dough balls the size of a large orange. Let them rise at room temperature for 30 minutes if not chilled, and about 2 hours if chilled.

The bread flour in the recipe is required in order to be able to stretch your dough very thin. You will find that a rolling pin will not be necessary. The dough should also be wetter than normal dough so that your pizza crust will have the air pockets of true artisan bread. Use flour to coat the dough so you can handle it. Stretch to about a 12 inch pizza, dust a pizza peel with flour, put the dough on it and top your pizza.

Note: If you choose to use premade dough such as Rhodes, it works fine. Just be aware that your crust will be thicker and you may need to use a rolling pin. You will also want to cook your pizza at a lower temperature for a bit longer.

Homemade Pizza - Fluffy Crust

This style of dough is premade bread dough from a grocery store bakery or store bought frozen dough.

1. Flour surface and stretch dough onto table or wooden pizza peel. Stretch your dough to 1/4” thickness or thinner, 10” – 12” round.
2. Follow pizza recipe instructions to construct your pizza by adding any sauce, cheese, and toppings.
3. Using pizza spatula or pizza peel, add your pizza to preheated oven (500° F - 550° F).
4. Cook 7-10 minutes or to your liking.
5. Remove pizza from oven and onto pizza peel, slice and serve.

Always be sure to turn stove off when finished cooking pizza.

Premade Pizzas – frozen or take and bake style

1. Preheat pizza oven to 500°-550° F and reduce heat to low.
2. Using pizza spatula or pizza peel, add your pizza to preheated oven.
3. Follow cooking instructions provided on your premade pizza.
4. Remove pizza from oven and onto pizza peel, slice and serve.

Always be sure to turn stove off when finished cooking pizza.

Take it to the Next Level!!

Experiment with different techniques and enjoy learning how to cook the different styles of pizza that are possible with your Italia Pizza Oven.

Go online to find great recipes for deep dish pizza, calzones, cedar plank salmon and more. Have fun trying them out with your pizza oven.

The instructions in this booklet are a guide to cooking great pizza. Temperatures are averages and results may vary. Making great pizza is fun and an art. Experience and practice will help you get the best results from your pizza oven.

Easy Artisan Focaccia Bread

**Ingredients**
- Pizza dough ball
- Olive oil (about 1 T)
- Pinch of salt
- Grated Mozzarella cheese
- Parmesan cheese

**Instructions**

Begin by stretching a dough ball into a thin 12” round and laying it on a floured pizza peel. Sprinkle olive oil and salt evenly onto dough. Put a small amount of grated Mozzarella and Parmesan cheese on top. The cheese should be less than half of what it would be on the pizza.

Tomato Pizza Sauce

**Ingredients**
- 1 can crushed tomato (28 oz.)
- 1 can tomato paste (12 oz.)
- 2 t. salt
- 2 t. sugar
- 1 T. fresh oregano, minced

**Instructions**

Combine ingredients and mix well.

White Pizza Sauce

**Ingredients**
- ½ cup butter (1 cube)
- 1 to 2 cloves garlic
- ½ cup flour
- 2 cups heavy cream
- 1 ½ t. salt

**Instructions**

Melt butter in small sauce pan, add garlic and sauté until soft. Add flour and stir until smooth and golden brown. Add cream and cook just until thickened, do not boil. Add salt to taste.

Artisan Pepperoni Pizza

**Ingredients**
- Pizza dough ball
- Red sauce
- Grated Mozzarella cheese
- Pepperoni
- Grated Parmesan cheese

**Instructions**

Begin by stretching a dough ball into a thin 12” round and laying it on a floured pizza peel. Spread red sauce onto the dough then cover with grated mozzarella. Cover with pepperoni and sprinkle with parmesan cheese.

Artisan Margherita Pizza

**Ingredients**
- Pizza dough ball
- Olive oil (about 1 T.)
- Pinch of salt
- Grated mozzarella cheese
- Parmesan cheese

**Instructions**

Begin by stretching a dough ball into a thin 12” round and laying it on a floured pizza peel. Spread a thin amount of red sauce on the dough. Top with slices of mozzarella spaced evenly. Tear the basil leaves to desired size and put on top of mozzarella. Sprinkle with Parmesan and olive oil.
Artisan Chocolate, Caramel, Pecan Pizza

**Ingredients**

- Coconut
- Chocolate chips
- Pecans
- Caramel topping
- Brown Sugar

**Instructions**

Stretch or roll a dough ball and place onto a pizza peel. Sprinkle a handful of coconut, chocolate chips, and pecans. Top with caramel topping and a sprinkle of brown sugar. Cook in pizza oven for 5 – 10 mins or until crust is light brown and chocolate is melted. Add a few dollops of butter on top to add extra flavor if you choose.

Artisan Chicken with White Garlic Sauce Pizza

**Ingredients**

- Pizza dough ball
- White pizza sauce (see recipe above)
- Grated mozzarella cheese
- Fresh spinach
- Cooked chicken breasts broken to bite size pieces
- Mushrooms
- Onions
- Grated Parmesan cheese

**Instructions**

Begin by stretching a dough ball into a thin 12” round and laying it on a floured pizza peel. Spread a thin layer of white sauce onto dough and top with grated cheese, just enough to cover. Put a good handful of spinach on top of cheese (it will shrink a lot when cooked). Put chicken on top of spinach then add mushrooms and onions. Finish with a sprinkle of Parmesan cheese and olive oil (to keep chicken and vegetables from drying out during cooking).

Artisan Barbecue Chicken Pizza

**Ingredients**

- Pizza dough ball
- Cooked chicken breasts broken into bite sized pieces
- Your favorite BBQ sauce
- Grated mozzarella cheese
- Red onion, sliced very thin
- Fresh, chopped cilantro (optional)

**Instructions**

Begin by stretching a dough ball into a thin 12” round and laying it on a floured pizza peel. Spread a thin layer of BBQ sauce onto dough and top with grated mozzarella cheese, just to cover. Put sliced onion on top of cheese. Put chicken on top of onions. Finish with a sprinkle of mozzarella cheese and olive oil (to keep chicken and vegetables from drying out during cooking). After cooking, sprinkle with cilantro, if desired.
