CILANTRO

CORIANDRUM SATIVUM

INFO Family / Apiaceae Type / Annual Size / 1-2' Tall, 1-1.5' Wide

PLANT ZONE / 2-11 or indoors Preferred Temps / 50° - 80°

Cilantro plays well in a variety of cuisines—Mexican to Mediterranean to Asian. Its herbaceous, earthy taste isn't for everyone. But, if you love a good salsa or pesto then cilantro will be a nice addition to your herb garden. It needs full sun, well-drained soil, and requires a medium amount of watering.

SUNLIGHT

CHIVES

ALLIUM SCHOENOPRASUM

INFO Family / Herbaceous Type / Perennial Size / 10-15" Tall + Wide

PLANT ZONE / 3-9 or indoors Preferred Temps / 50° - 75°

SUNLIGHT
PART SUN 4-6 HRS

WATER
MEDIUM / WELL
DRAINED SOIL

GERMINATION
7-14 DAYS

Chives are an excellent way to add some flair to your dishes. They're low maintenance and easy to grow. Start them inside about 6 weeks before the last frost and your chives will germinate in 1-2 weeks.

TEN HERBS

DILL

ANETHUM GRAVEOLENS

INFO Family / Apiaceae Type / Annual Size / 3-5' Tall, 2-3' Wide

PLANT ZONE / 2-11 or indoors Preferred Temps / 40° - 80°

SUNLIGHT
FULL SUN 6+ HRS

WATER
MEDIUM / WET SOIL

GERMINATION
10-14 DAYS

Add dill to your seafood and vegetable dishes for a unique taste. Give them enough sunlight and a larger pot, as their roots need room to spread out and you should be able to harvest dill regularly until they flower.

TEN HERBS

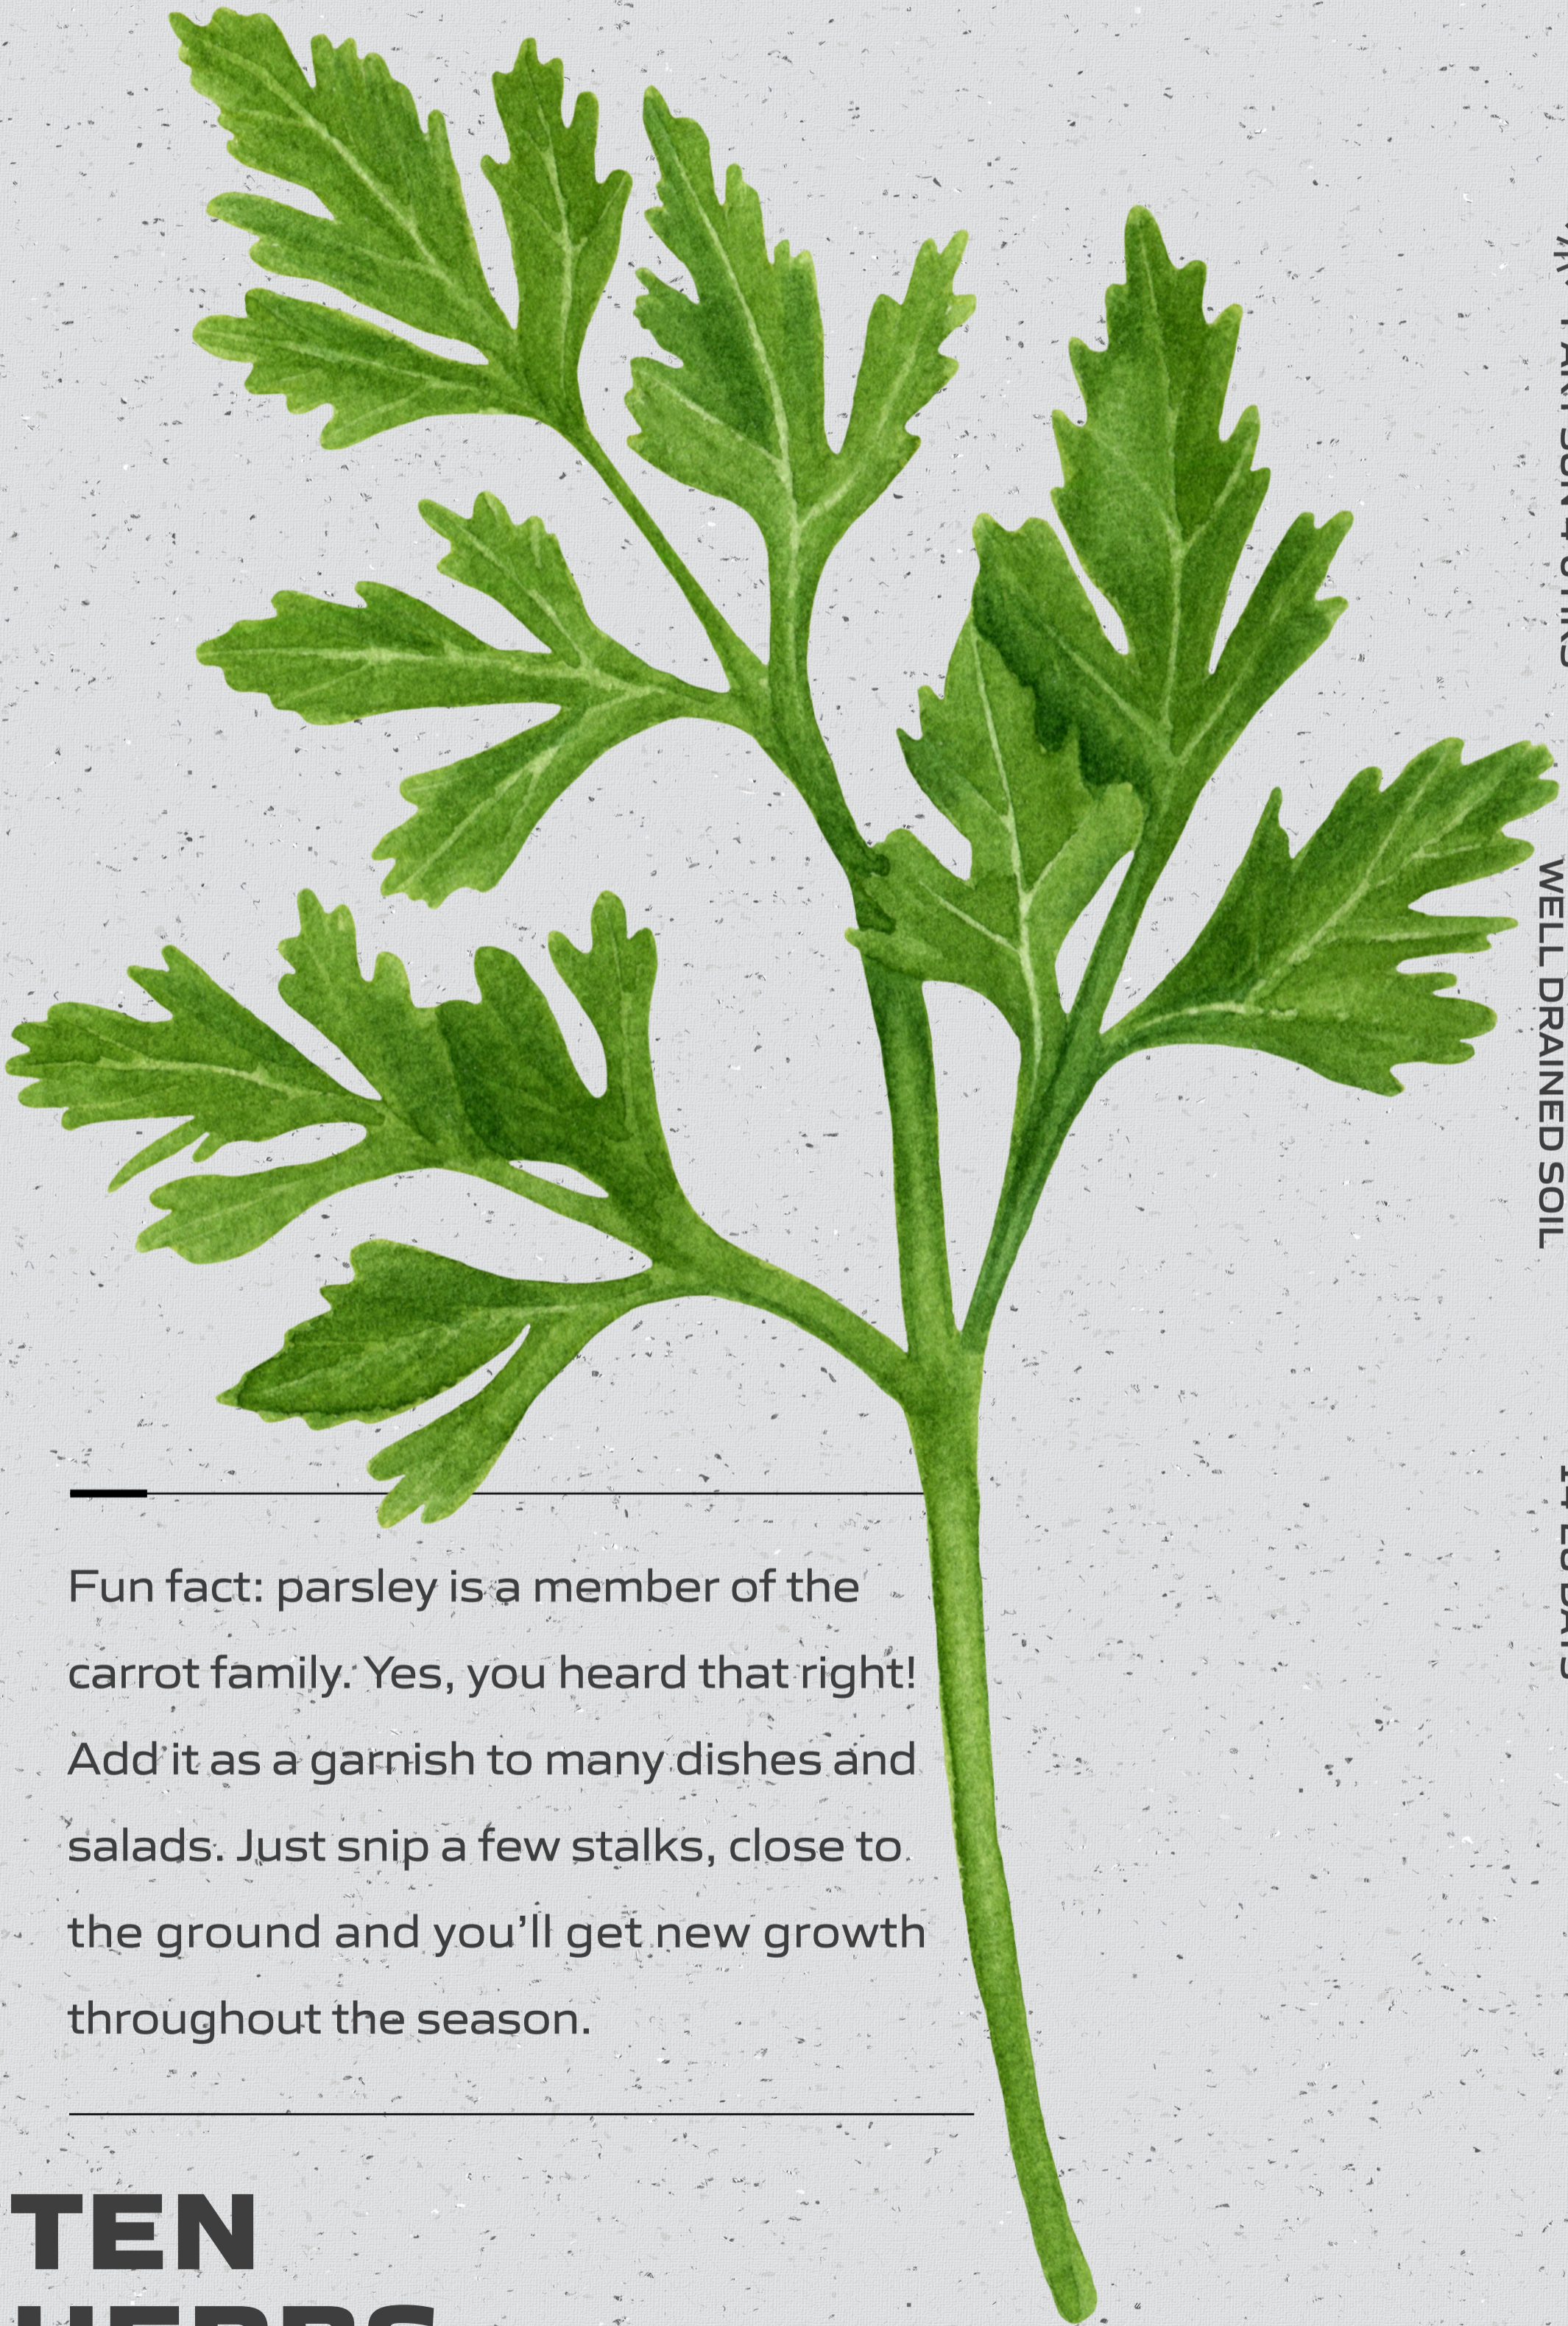

PARLSEY

PETROSELINUM CRISPUM

INFO Family / Apiaceae Type / Annual-or Biennial Size / 9-12" Tall, 9-12" Wide

PLANT ZONE / 2-11 or indoors Preferred Temps / 50° - 70°

SUNLIGHT
PART SUN 4-6 HRS

WATER
LOW - MEDIUM /
WELL DRAINED SOIL

GERMINATION
14-28 DAYS

Fun fact: parsley is a member of the carrot family. Yes, you heard that right! Add it as a garnish to many dishes and salads. Just snip a few stalks, close to the ground and you'll get new growth throughout the season.

PART SUN 4-6 HRS

WATER
MED-HIGH / DAMP-MOIST SOIL

GERMINATION
10-15 DAYS

You won't have much trouble starting out your herb garden with some peppermint. They're resilient and do best in a cool, yet moist climate. Peppermint is extremely versatile. Uses around the house, for food, and for health are endless.

TEN HERBS

Basil Rosemary Cilantro Oregano Chives Dill Parsley **PEPPERMINT** Sage Thyme

SAGE

SALVIA YANGII

INFO Family / Lamiaceae Type / Perennial Size / 3-5' Tall, 2-4' Wide

PLANT ZONE / 3a-9b Preferred Temps / 50° - 80°

SUNLIGHT
FULL SUN 6+ HRS

WATER
MED-HIGH / WELL
DRAINED SOIL

GERMINATION
10-21 DAYS

Sage is a herb underdog. It tends to be more of a holiday herb used to season chicken and sausage. It's great for infusing in butter, or smoked drink dishes. A little more high maintenance, sage requires daily heavy water, full sun, and, when starting from a seedling—a long germination period.

DRAINED SOIL

GERMINATION
10-21 DAYS

Thyme is an excellent addition to grilled meat and vegetables. Seedlings will take 10-21 days to germinate so buying an already established plant might be the best route. You'll find that thyme doesn't have high watering needs and some variants are even drought friendly.
